

## **Downtown Construction Activities**

### ***Proposed work activities for the week of March 7<sup>th</sup>, 2021***

- The remaining items at the Hancock St sidewalk improvement project will be finished this week. These items include installing new tree grates, finishing brick banding, and placing new parking signs. The sidewalk and parking along this area are open to public during the remainder of construction.
- The contractor at the Generals Bridge project will continue forming/pouring the north plinths and the south concrete barrier walls at the back of the future sidewalks.
- The contractor at the General Dunford Drive project will continue installing new drainage within the planter bed area behind the serpentine wall and backfilling this area with new planting soils. In addition, the contractor will continue new brick banding and permeable pavers within the new park. Temporary barriers remain in place on Hancock St for temporary traffic re-alignment. Pedestrians should continue crossing the street at the crosswalk before this area.
- At the McConville Way project the contractor will continue construction of the north and south streetscape aside the new roadway. The work this week includes the installation of brick pavers, concrete sidewalks, planting soils, and a new irrigation system. The contractor will continue improvements to the dumpster enclosure between South Shore Health and BAMSI buildings. The alleyway in this area remains closed. The contractor will continue installing new concrete apron/sidewalk to the garage entrance of the SAR building. All traffic entering/exiting the garage will need to utilize the garage exit only. In addition, the contractor will continue improvements to the dumpster enclosure between South Shore Health and BAMSI buildings this week. The alleyway in this area remains closed. Finally, at the future pocket parks, the contractor will continue construction of the water feature plumbing/electrical/foundation, bollard foundations, mud slab, planter curbs, park drainage (at Clividen Place pedestrian entrance), and park underground electrical.
- Abatement of the 100 Parking Way building will continue this week on the first floor of the building. The contractor will continue removing the material from the building and loading it into a series of dumpsters along McConville Way and Parkingway. There remains no parking along the face of the building at McConville Way and Parkingway. Finally, there will be vacuum excavation and boring investigations along Parkingway at the beginning of the week.
